

# EDGAR CAMACHO

Chicago, IL 60607 - 847-602-6868

[edgarc0998@gmail.com](mailto:edgarc0998@gmail.com) - [linkedin.com/edgar0998](https://www.linkedin.com/in/edgar0998) - [github.com/edgarc0998](https://github.com/edgarc0998)

---

## Technologies

**Proficient:** Javascript, React, React Native, Node.js, Express, SQL, HTML, CSS, C++, Semantics UI, Git

**Knowledgeable:** Jasmine, Mocha, Chai, Java, Java Fx, C, Neo4j, Clarifai

---

## Projects

*Nutrio - Developer - [github.com/Nutrio](https://github.com/Nutrio) August 2019 - September 2019*

*Tech stack: Neo4j, Victory Native, Node.js, React Native, Clarifai, Nutritionix, Postgres, Express, Redux*

- React native app for weight management, meal planning, and tracking fitness progress
- Developed frontend/backend components for daily log, profile, and searching for foods
- Uses Neo4j for recommendation engine used for meal plan suggestions
- Clarifai is used for image recognition to track/find calorie information by taking a picture of your food

*Grace Shopper - Developer - [graceful-shoveler.herokuapp.com/shovels](https://graceful-shoveler.herokuapp.com/shovels) July 2019 - August 2019*

*Tech stack: Node.js, React, Express, Postgres, Redux, Apify, Styled Components, Jasmine*

- Functional e-commerce website “selling” real products scraped from an online retailer using Apify
- Developed frontend/backend components for all products view, single product view, and cart view
- Implemented infinite scrolling for all products view, checkout cart logic/persistence
- Worked in a group of four in a week and a half sprint

*Tank Battles - Solo Developer - [github.com/tanks](https://github.com/tanks) April 2019- May 2019*

*Tech stack: Node.js, Sockets, Express, HTML, CSS*

- An HTML game where 4 players fight against each other on a battlefield
  - Backend uses Express and Sockets to communicate with the server and allows the clients to communicate.
- 

## EDUCATION

**University of Illinois at Chicago (UIC)** Sept 2017 - May 2021

- Bachelor of Science in Computer Science(partial, minor earned so far).  
Completed courses: Data Structures, Software Design, Discrete Mathematics, Machine Language

**Fullstack Academy** May 2019 - Sept 2019

- Fullstack Academy is a rigorous software development school teaching professional level practices in front and back end web development. Its curriculum is a pragmatic mix of computer science theory, algorithms and data structures, and practical usage of industry standard tools and libraries.
- 

## WORK EXPERIENCE

### BOOTH ONE

*Banquet Houseperson* October 2018 - July 2019

- Responsible for setting up and breaking down rooms for banquet events
- Dealing with guests and providing for their requests
- Hectic, teamwork based role
